Health Guarantee

Congratulations on your purchase of an Irish Wolfhound puppy. We strive to produce the finest Irish Wolfhounds available, and want clients to feel secure purchasing from us.

Your pup was checked by Dr, Don Volk at Timberland Animal Hospital

(207) 827-7177) on _____ and found to be in good health. All pups received their first vaccination and third worming at that time. Your pup ought to be checked by your veterinarian no later than _____, at which time the pup will be ready for its second vaccination. Rabies shots may be given in Maine @ 12 weeks of age.

Refund policy: Your pup is guaranteed free of birth (congenital) defects and hereditary defects for one year after date of purchase (unless otherwise disclosed, (i.e. hernia). If your pup is diagnosed with any congenital or hereditary defects within the first year you have your dog, you may:

1. Return the pup and pick another of your choice from the next litter, at no additional cost (except shipping, which is always at the buyers expense).

2. If the pup must be euthanised for the reasons stated above, I will replace it from the nex available litter. A written statement from your veterinarian must be received within 10 days; I reserve the right to have my veterinarian examine the pup.

3. I do not endorse the BARF diet (Bones and Raw Food). If you feed your pup any raw meat or bones, this contract is null and void, as raw meat and/or bones can seriously affect the health of your puppy, as it would human beings.
